

STE PTT 2 Question Bank

Unit 3

- 1. Sketch Use-Case diagram for Hotel Management System with minimum two actors and four use cases.**
- 2. Differentiate between Black Box Testing and White Box Testing. (Six points)**
- 3. Draw neat labelled diagram for translation of requirement model into design model.**
- 4. Explain decision table with example. Accessing secured network.**
- 5. Draw and explain conceptual data model with E-R diagram for employee management system.**
- 6. Draw use-case diagram for ATM system with minimum four use cases and two actors.**
- 7. Sketch use-case diagram for Library management with minimum four use cases and two actors.**

Unit 4

- 1. State different types of estimations in Software Projects.**
- 2. Describe 4 P's of management spectrum.**
- 3. Describe function point metrics for size estimation.**
- 4. Describe RMMM strategy with example.**
- 5. Use COCOMO model to calculate :**
i) Efforts ii) Development Time iii) Average staff size iv) Productivity.
If estimation size of product is 400 KLOC using organic model.
- 6. Specify following cost directives of COCOMO :**
i) Product Attributes ii) Hardware Attributes
- 7. Describe following project cost estimation approaches :**
i) Heuristic ii) Empirical

8. Explain line of code metrics for size estimation.

9. Describe a cocomo and cocomo-II models.

Unit 5

1. Define PERT and CPM. (2M)

2. Define Project Scheduling. (2M)

3. What is Gantt Chart? State its Advantages. (2M)

4. Explain Work breakdown Structure with suitable diagram. (4M)

5. State and Explain any 4 Principles of project scheduling. (4M)

6. Prepare timeline chart for ATM machine. (4M)

7. Prepare macro time line chart for 15 days of college management system (5 days a week). (4M)

Unit 6

1. Differentiate between Software Quality Management and Software Quality Assurance.

2. Apply the phases of Software Quality Assurance in software development project.

3. Describe six sigma. State operations in DMADV/DMAIC.

4. Describe CMMI. Give significance of each level
