

Practical no. 9

Name :- Danish Altaf Solkar

Enrolment no. :-24111590805

Class :- CO3K – B

Subject :- OOP

Aim :- WAP to declare class 'Account' having data members as Account_no and balance. Accept this data for 10 accounts and display data of accounts having balance greater than 10000.

Program :-

```
#include<iostream.h>

#include<conio.h>

class Account{

int account_no;

int balance;

public:

void accept(){

cout<<"\nEnter your Account Number :- ";

cin>>account_no;

cout<<"\nEnter your Balance :- ";

cin>>balance;

}

void display(){

if(balance>10000){

cout<<"\nYour Account Number :- "<<account_no;

cout<<"\nYour Balance :- "<<balance;

}

}

};

void main(){
```

```
Account a[10]; //Array of Object
```

```
int i;
```

```
clrscr();
```

```
for(i=0;i<10;i++){
```

```
cout<<"\nAccount "<<i+1;
```

```
a[i].accept();
```

```
}
```

```
for(i=0;i<10;i++){
```

```
cout<<"\nAccount "<<i+1;
```

```
a[i].display();
```

```
}
```

```
getch();
```

```
}
```

OUTPUT:-

The screenshot shows a DOS window titled "NeuTroN DOS-C++ 0.77, Cpu speed: max 100%". The output displays the execution of a C++ program that creates an array of 10 Account objects. The first 5 accounts are shown, each with a unique account number and a balance. The program prompts the user to enter the account number and balance for each account.

```
Account 1
Enter your Account Number :- 111
Enter your Balance :- 1000
Account 2
Enter your Account Number :- 112
Enter your Balance :- 2000
Account 3
Enter your Account Number :- 113
Enter your Balance :- 3000
Account 4
Enter your Account Number :- 114
Enter your Balance :- 4000
Account 5
Enter your Account Number :- 115
Enter your Balance :- 5000
```
