

EES UNIT 1 Question Bank

1. Environmental Studies _____

- a. is an interdisciplinary academic field.
- b. methodically studies human interaction with the environment.
- c. includes the natural environment, built environment, and the sets of relationships between them.
- d. all of the above.**

2. Environmental studies does not involve _____

- a. psychology
- b. demography
- c. ethics
- d. literature**

3. An organisms environment is the surrounding conditions that affect that organism.

- a. True**
- b. False

4. Political decision are made with respect to political jurisdictions; environmental problems _____

- a. often transcend these jurisdictions**
- b. respect political boundaries
- c. often have little to do with regional economic decisions
- d. none of the above

5. Environmentalist who uses an ecosystem approach to comprehend environmental issues will take into consideration which of the following?

- a. Human activity
- b. The interactions between organisms
- c. Geography
- d. All of the above**
- e. None of the above

6. Abiotic environment does not include _____

- a. soil
- b. water
- c. air
- d. plant**

7. Van Mahotsav is an annual tree-planting festival in India, celebrated on

- a. 2nd June
- b. 1st July**
- c. 1st December
- d. 15th September

8. Biotic environment includes _____

- a. producers
- b. consumers
- c. decomposers
- d. all the above**

9. Outcomes of Rio Conference do not include _____

- a. the UN Framework convention on Climate Change
- b. The convention on Biological Diversity (CBD)
- c. Convention for the Protection of the Ozone Layer**
- d. Commission on Sustainable Development (CSD)

10. Which of the following follow the concept of sustainable development ?

- i) Fishing the mature fish instead of the young fish**
- ii) Using wind power instead of burning coal to generate electricity**
- iii) The prohibition of trading endangered species**
- a. i and ii only
- b. i and iii only
- c. ii and iii only
- d. i, ii and iii**

11. The evidence that the world is experiencing an environmental crisis is highly visible in many parts of the world.

- a. True**
- b. False

12. The natural world uses resources efficiently, while humans tend to waste resources more.

- a. True**
- b. False

13. The Montreal Protocol, signed in 1987 and strengthened in 1990 _____

- a. attains global optimal level of common property resource
- b. relies on internationally tradable emission permits
- c. minimizes free riders of public goods
- d. reduces ozone depletion through the cutting of chlorofluorocarbon production**

14. The main outcome of the 1992 United Nations Conference on Environment and Development, held in Rio de Janeiro, Brazil, was _____

- a. It produced a blueprint intended to guide development in sustainable directions**
- b. a global agreement on a framework for environmental legislation
- c. a report entitled Our Common Future
- d. it raised awareness of the need to preserve biodiversity in the Amazon River Basin

15. The notion of environmental justice refers to _____

- a. grassroots activities that monitor environmental conditions and work toward equal distribution of environmental impacts and benefits**
- b. rewarding those who work hard for environmental improvement, such as grassroots organizations
- c. environmental racism, where waste sites and other hazardous facilities are more likely to be located in nonwhite neighborhoods
- d. prosecution of environmental offenders by government agencies

16. Which of the following global trends is of great concern for the future of our environment?

- a. degradation of fertile soils
- b. changes in the global atmosphere
- c. species extinction leading to the loss of biodiversity
- d. population growth and increasing per capita consumption of resources
- e. all of the above**

17. Introduction of chemicals into atmosphere is known as _____

- a. air pollution
- b. radioactive pollution
- c. atmospheric pollution**
- d. dense pollution

18. Second highest layer of Earth's atmosphere is _____

- a. stratosphere
- b. mesosphere
- c. troposphere
- d. thermosphere**

19. Re-processing material to make another product _____

- a. Reduce
- b. Reuse
- c. Recycle**
- d. Recovery

20. Most recycling focuses on four major categories of products. Which one of these is NOT one of them ?

- a. Chemicals**
- b. Paper
- c. Plastic
- d. Glass

21. The following is an example of reusing _____

- a. Using less napkins at entries
- b. using waste plastic bags as garbage bags**
- c. Bringing plastic bottles/bags at recycle facility
- d. Using gain the plastic/cloth bags for shopping

22. the following is an example of reducing _____

- a. Using less water while brushing teeth**
- b. Using recycled plastic bags
- c. Bringing newspaper at recycle facility
- d. All of the above

23. Which of the following items cannot be recycled ?

- a. Food items
- b. Plastic
- c. Paper
- d. Batteries**

24. What is the term used to describe objects that are being washed and used again ?

- a. Reduce
- b. Reuse**
- c. Recycle
- d. Recovery

25. What does it mean if an item is 'biodegradable' ?

- a. It means that it will eventually break down completely in nature**
- b. It means that it is bad for the environment
- c. It means that it is perfect for composting
- d. It means that it can be eaten by vultures

26. When did the Three Mile Island accident happen ?

- a. March 11, 1979
- b. March 28, 1979**
- c. May 04, 2011
- d. July 05, 1967

27. The Three Mile Island accident happened in Pennsylvania. The reactor had a number of automated safety systems. Clearly, all did not go as the designers expected. What went wrong with the automated safety systems ?

- a. Generally, they worked as designed. However, the operators overrode several of these systems and made the accident much worse than it would otherwise have been**
- b. There was a lightning strike at the plant and the electronic systems were fried
- c. the designers did not account for a loss of feed water to the reactor so there was no backup when that supply of water was cut off
- d. the backup supplies of cooling water were insufficient to cool the nuclear fuel

28. There was a lot of debate on the radiation releases from the accident at the Three Mile Island. What was the final conclusion on the magnitude of the public exposure ?

- a. The public were not exposed to dangerous levels of radiation from the accident. No discernible health effects occurred.**
- b. Thousands of people were seriously exposed to high levels of radiation as a result of the accident at Three Mile Island. While tracking deaths is difficult, it is estimated that hundreds died due to their exposures.
- c. the radiation exposure would have been very high since the releases were large. however, with the prompt evacuation, no lethal exposures occurred.
- d. Hundreds of people were seriously exposed to high levels of radiation as a result of the accident at Three Mile Island. While tracking deaths is difficult, it is estimated that more than ten died due to their exposures.

29. How much response was there from the government and nuclear industry regarding the Three Mile Island accident ?

- a. Neither the government or industry did much as the event quickly fell out of the public eye
- b. The government made a lot of serious proposals, but the nuclear industry largely ignored them
- c. Both the government and the nuclear industry made fundamental changes in how nuclear power was regulated and how plants were operated**
- d. The government was distracted by the Iran hostage crisis but the nuclear industry seeing the loss of a huge investment took on a big effort to prevent future similar events

30. Let's turn to the Chernobyl accident which happened in 1986, The Chernobyl power station had four RBMK reactors. RBMK is a Russian acronym. The accident occurred in Unit 4, the newest of those at the station. How much are the normal modern Western nuclear power reactors like the RBMK reactors ?

- a. They are very different**
- b. The Soviets stole from the French, the British, the Americans and the Japanese. The RBMK is a mix of all these and, therefore, alike in some ways to each but not exactly alike
- c. Since the Soviet Union stole the Western reactor designs, they are very similar
- d. The Soviet design was unique and incorporated many advanced features not included in Western designs

31. In addition to the lack of containment what other feature of the RBMK design magnified the radioactive material releases from Chernobyl ?

- a. Water shooting from broken pipes carried radioactive material away from the plant
- b. the graphite caught fire and the thermal plume of the fire pushed radioactive material high into the atmosphere**
- c. The other three reactors at the site were damaged by the event in Unit 4 and released additional radioactive material
- d. The workers were afraid and did nothing to even

32. The radiation released from the Chernobyl accident are expected to be the major cause of death in the surrounding population for years to come.

- a. True
- b. False**

33. Now the Fukushima reactors in Japan. How did the earthquake cause a loss of control of the power level of the operating reactors ?

a. The earthquake jammed all the control rods out of operating reactors and they could not be shutdown

b. It didn't. the reactors that were shutdown stayed shutdown. those operating shutdown automatically

c. The automated systems tried to shutdown the reactors, but the operators, concerned for the need for electricity after this national disaster, kept them running at full power

d. The earthquake caused the reactors at Fukushima to run up to very high power like the Chernobyl reactor

34. Why didn't the Fukushima plant systems which were designed to keep the nuclear fuel cool work ?

a. They were poorly designed and didn't have the necessary capacity

b. The reactors were so badly damaged that there were no pipes left to carry cooling water into the reactor

c. The operators, like those at Three Mile Island, misunderstood what was going on and they shut down all the key systems

d. Between the earthquake and the tsunami, all the sources of electrical power were compromised and the cooling systems could not function

35. Which of the following is greenhouse gas ?

a. Carbon mono oxide

b. Carbon dioxide

c. Acid fumes

d. Oxygen

36. Which of the following is greenhouse gas ?

a. Sulphur dioxide

b. Methane

c. Nitrogen

d. Oxygen

37. Which among the following can cause global warming ?

a. Fishing

b. Volcanic eruptions

c. Mudslides

d. Plantation

38. What is green house effect ?

- a. Increased landslides
- b. Extra volcanic eruptions
- c. more Mudslides
- d. Sea level rise**

39. What does a green house gas do ?

- a. It causes more heat to be kept out of the Earth
- b. It causes the sun's light to be kept out of the Earth
- c. It absorbs and holds in heat**
- d. It causes acid rain

40. The Taj mahal is affected by _____

- a. Soil pollution
- b. Water pollution
- c. Air pollution**
- d. Fog

41. How to prevent Acid rain _____

- a. By increasing the emission of SO₂ and NO₂
- b. By decreasing the emission of SO₂ and NO₂**
- c. By increasing the emission of HCL and Phosphate
- d. By decreasing the emission of HCL and Phosphate

42. The appropriate way to reduce the effect of acid rain on soil _____

- a. By adding hydrochloric acid to the soil
- b. By adding limestone to the soil**
- c. By adding nitrogen to the soil
- d. By adding oxygen to the soil

Additional questions

1. The word environment is derived from French word _____

- a. Environner**
- b. Environnering
- c. E-Environner
- d. Envo

2. As per the French word ENVIRONNER means _____

- a. atmosphere
- b. earth and sun
- c. encircle and surround**
- d. earth and energy

3. World Environment Day is on _____

- a. June 5**
- b. June 11
- c. July 5
- d. July 11

4. World day of water is on _____

- a. April 22
- b. March 23
- c. March 24
- d. March 22**

5. Earth day is on _____

- a. January 22
- b. February 22
- c. March 22
- d. April 22**

6. Ecomark of our country _____

- a. Earthen pitcher**
- b. Water drop
- c. Sun
- d. Ashoka tree

7. Environmental friendly products are given ISO certification called ISO _____

- a. 12000
- b. 13000
- c. 14000**
- d. 15000

8. Nobel peace prize in 2004 for contribution towards environmental conversation was awarded to _____

- a. Ratan Tata
- b. Wangari Maathai**
- c. S. D. Bush
- d. Dr. Manmohan Singh

9. Earth summit, the conference on Environment and development held at Rio de Janeiro in _____

- a. 1892
- b. 1992**
- c. 2012
- d. 2011

10. World summit on sustainable development held at Johannesburg in _____

- a. 2001
- b. 2002**
- c. 2003
- d. 2004

11. He is popularly known as the Green judge.

- a. Mr. Manmohan Singh
- b. Kuldeep Singh**
- c. Mangal Singh
- d. Mr. Jethmalani

12. He is known as the Green advocate.

- a. Mr. K. P. Raghav
- b. Mr. P. Chidambaram
- c. Mr. S. D. Rao
- d. Mr. M. C. Mehta**

13. He is known for 'Chipko Movement'.

- a. Atal Bihari Bajpeyi
- b. Anna Hajare
- c. Sundarlal Bahuguna**
- d. Pandit Nehru

14. He got the Magsaysay award for water conservation effort.

- a. Rajender Singh**
- b. Ashok Singh
- c. Nana Patekar
- d. Anil Agarwal

15. Wild life week is celebrated in the period of _____

- a. 1-7th October**
- b. 11-18th November
- c. 1-8th March
- d. 1-8th April

16. World Forest day is on _____

- a. 11 March
- b. 12 March
- c. 13 March
- d. 21 March**

17. Edaphic means _____

- a. Related to water
- b. Related to soil**
- c. Related to air
- d. Related to sun

18. The environment which has been modified by human activities is called _____

- a. Natural environment
- b. Modern environment
- c. Anthropogenic environment**
- d. Semi-natural environment

19. The term ecology was introduced by _____

- a. Haeckel**
- b. Newton
- c. S. S. Rao
- d. Tansley

20. The ecological factors related to soil and substratum are called _____ factors.

- a. Edaphic**
- b. Somatic
- c. Air-borne
- d. Egis

21. The inter governmental conference on environmental education in 1977 was held in _____

- a. Tblisi (USSR)**
- b. Delhi (India)
- c. Albita
- d. New York (USA)

22. Abiotic components are _____

- a. non living**
- b. living
- c. artificial
- d. earth living

23. CFC's that contributes to the depletion of _____

- a. ozone layer**
- b. cartoon layer
- c. SO₂ layer
- d. methane layer

24. The major green house gases are _____

- a. CO₂ , CH₄ , N₂O**
- b. CO₂ , O₂ , SO₂
- c. CH₄ , CH₃ , CH₅
- d. CO₂ , CO₃ , O₂

25. Greenhouse gases are regulated under the UN framework convention on climate change and the _____

- a. Tokyo protocol
- b. Kyoto protocol**
- c. Mumbai protocol
- d. Narvey protocol

26. _____ are animals that have no backbone and are visible without magnification.

- a. Micro
- b. Mini
- c. Macro invertebrates**
- d. Non-macro vertebrates

27. Montreal protocol is related to _____

- a. Depletion of ozone layer**
- b. Cartoon layer
- c. SO₂ layer
- d. Sulphur layer

28. _____ are the most common cause of viral gastroenteritis in human.

a. Noroviruses

b. Bitaviruses

c. Fungi

d. Yeasts

29. OCED stands for _____

a. Organisation for Economic Co-operation and Development

b. Organisation for Environmental Company and Development

c. Organisation for Environmental Company and Department

d. Organisation for Economic Co-operation and Department

30. _____ on cryotic soil is soil at or below the freezing point of water 0° C (32°F) for two or more years.

a. Permafrost

b. Frost

c. Primefrost

d. Thermofrost

31. Area in the interface between land and river or stream is called as _____

a. spring

b. riparian

c. forest

d. forest land

32. Developments that meets the need of present without compromising the ability of future generations to meet their own needs is called as _____

a. sustainable development

b. stable development

c. future development

d. natural development

33. Van Mahotsav is an annual tree-planting festival in India, celebrated on _____

a. 1st March

b. 2nd March

c. 1st July

d. 2nd July

34. The scientific method of dating based on the analysis of patterns of tree-rings is called as _____

- a. Dendrochronology**
- b. Ecosystem
- c. Expost
- d. Ecology

35. Place or type of site where an organism or population naturally occurs.

- a. Habitat**
- b. Collapse
- c. Biotop
- d. Biosphere

36. _____ is called as area which is interface between land and river or stream.

- a. Riparian**
- b. Biosphere
- c. Biotop
- d. Habitat

37. The lowest layer, the troposphere, is only _____ kilometer thick.

- a. 1
- b. 2
- c. 12**
- d. 20

38. The stratosphere is _____ kilometer thick.

- a. 1
- b. 2
- c. 50**
- d. 100

39. The stratosphere contains a layer of _____ which is instrumental in the formation of rain.

- a. sulphates**
- b. CO₂
- c. O₂
- d. CO₂ + O₂

40. Stratosphere contains layer of _____

- a. O
- b. carbon
- c. ozone**
- d. water

41. Layer of ozone absorbs _____ known to cause cancer.

- a. Ultra violet light**
- b. Beta violet light
- c. Bright light
- d. Super light

42. The accumulation of carbon dioxide and other gases cause _____ in the atmosphere that is leading to global warming phenomenon.

- a. light effect
- b. green house effect**
- c. yellow light effect
- d. solar effect

43. Lithosphere provides us the soil for _____

- a. rain water harvesting
- b. wild life
- c. agriculture**
- d. non-agriculture

44. There are _____ types of lithosphere.

- a. four
- b. six
- c. eleven
- d. two**

45. The biosphere is also called as _____

- a. zone of life on earth**
- b. zone of wildlife on earth
- c. life in environment
- d. life on earth and moon

46. The biosphere is postulated to have evolved at least some _____ billion years ago.

- a. 1.5
- b. 2.5
- c. 3.5**
- d. 4.5

47. By their percentage contribution to greenhouse effect on earth, the four major gases are water vapour, carbon dioxide, methane and _____

- a. oxygen
- b. sulphur
- c. ozone**
- d. H₂S

48. The global temperatures has increased _____ degree Celsius in last 100 years.

- a. 100
- b. 200
- c. 0.74**
- d. 11.72

49. Acid rain is caused by emissions of carbon dioxide, sulphur dioxide and _____
a. nitrogen oxides

- b. ozone
- c. oxygen
- d. CO₃ + ozone

50. ODS stands for _____

- a. Ozone depleting substances**
- b. Oxygen depleting substances
- c. Oxygen deposit substances
- d. Oxygen developing substances
