

EES UNIT 2 Question Bank

1. Which one of the following is an example of non renewable resources?

- a) Wind
- b) Vegetation
- c) Coal and minerals**
- d) Water

2. Which of the following is a renewable resource?

- a) Wind
- b) Water
- c) Flora and fauna
- d) All the above**

3. Which gas in stratosphere does provide protection to our life?

- a) Argon
- b) Nitrogen
- c) Oxygen
- d) Ozone**

4. The life supporting gases such as O₂ , CO₂ , and N₂ are chiefly concentrated in the

- a) Troposphere**
- b) Exosphere
- c) Homosphere
- d) Stratosphere

5. Floods can be prevented by

- a) afforestation**
- b) removing the top soil
- c) cutting the forest
- d) tilling the land

6. Biogas generation is mainly based on the principle of _____

- a) anaerobic degradation**
- b) aerobic decomposition
- c) putrefaction
- d) none of the above

7. Which one of the following is not a fossil fuel ?

- a) Petroleum
- b) Coal
- c) Natural gas
- d) Uranium**

8. The death of the last individual of a species is called _____

- a) extinction**
- b) endanger
- c) neither nor
- d) diversity

9. Atomic energy is obtained by using ores of _____

- a) copper
- b) uranium**
- c) lead
- d) crude oil

10. _____ is the major raw material for biogas.

- a) Tree leaves
- b) Grass
- c) Cow dung**
- d) Waste from kitchen

11. In the atmosphere, the layer above the troposphere is _____

- a) exosphere
- b) mesosphere
- c) stratosphere**
- d) thermosphere

12. Both power and manure are provided by _____

- a) hydroelectric plants
- b) gobar gas plants**
- c) nuclear power plants
- d) thermal plants

13. Which of the following is not considered to be a natural resource?

- a) soil
- b) river
- c) scenery
- d) climate
- e) all of the above are examples of natural resources**

14. Total earth's surface covered by water is _____

- a) 75%**
- b) 80%
- c) 60%
- d) 65%

15. Biotic component of biosphere is not constituted by _____

- a) producer
- b) decomposer
- c) consumer
- d) air**

16. An increase in carbon dioxide content in the atmosphere would not cause _____

- a) more heat to be retained by the environment
- b) increase in photosynthesis
- c) global warming
- d) abundance of desert plants**

17. Oxygen is returned to the atmosphere mainly by _____

- a) respiration
- b) photosynthesis**
- c) fungi
- d) burning of fossil fuels

18. Among the given options, which one is not correct for the use of large amount of fertilisers and pesticides ?

- a) They are eco-friendly**
- b) They turn the field barren after some time
- c) They adversely affect the useful component from the soil
- d) They destroy the soil fertility

19. Which rays are stopped by ozone layer in stratosphere ?

- a) UV rays**
- b) Infrared
- c) X-rays
- d) Gamma rays

20. Atmosphere not uniformly heated by the sun does not cause _____

- a) air flows
- b) variations in climate
- c) rainfall
- d) tides**

21. Which is not true ?

- a) Lithosphere includes the crust and the uppermost mantle
- b) Lithosphere is underlain by the asthenosphere
- c) Lithosphere provides timber**
- d) Lithosphere is broken into tectonic plates

22. Which is false about biosphere ?

- a) It is the global sum of all ecosystems
- b) It can also be called the zone of life on Earth
- c) It does not contain microbes**
- d) It has evolved at least some 3.5 billion years ago

23. Natural resources do not include _____

- a) water
- b) refined oil**
- c) air
- d) wood

24. Demand for a resource does not change with the change in _____

- a) idea**
- b) need
- c) technology
- d) economy

25. A renewable resource is a resource which is replaced _____

- a) naturally**
- b) by human
- c) by animals
- d) all of the above

26. Which is true?

- a) Oxygen content may not get reduced if forest cover is not sufficient on the earth.
- b) Forests can be said to behave like non-renewable resources if not overused.
- c) Fishes are capable of reproducing at the rate at which they are being caught.
- d) None of the above.**
- e) All of the above.

27. Non-renewable resources, once used _____

- a) remain on earth in a different form.
- b) become waste material.**
- c) are recycled.
- d) all of the above.
- e) none of the above.

28. Which of the following is a better definition for natural resources conservation?

- a) protection of wildlife.
- b) environmental activism.
- c) efficient use of natural resources.
- d) preservation of natural resources.**

29. What was the approximate world population of humans in the year 2008?

- a) 667 million
- b) 66 billion
- c) 6.67 billion**
- d) 6.67 million

30. Which of the following is a renewable resource?

- a) Salmon population that is farm raised**
- b) Sulphur
- c) Light sweet crude oil shipped from Saudi Arabia
- d) Iron ore that is commercially mined

31. Which option below is not an example of pollution?

- a) Smog in Delhi
- b) Nuclear waste
- c) Overpopulation**
- d) Untreated sewage

32. Fertile soil is always a renewable resource.

- a) True
- b) False**

33. Progress that meets the needs of the present without compromising the ability of future generations to meet their own needs is

- a) the tragedy of commons
- b) sustainable development**
- c) net primary productivity (NPP)
- d) the impossibility theorem

34. Biodiversity _____

- a) includes genetic, species, ecosystem and functional diversities**
- b) refers to diversifying earth's non renewable resources
- c) refers to reconstruction of tropical rainforests
- d) refers to biological effects on commercial plantation

35. The greenhouse effect is the phenomenon by which

- a) biological diversity is dominant in agricultural production
- b) the globe's water pollution affects plankton
- c) the earth's atmosphere traps infrared radiation**
- d) climatic changes occur naturally in the forest

36. Of given below, which is the non-conventional source of energy?

- a) Sun**
- b) Coal
- c) Wood
- d) Diesel

37. Percentage of total water found as fresh water is _____

- a) 87.5%
- b) 2.5%**
- c) 97.5%
- d) 75%

38. Mining depends upon _____

- a) Concentration of mineral only
- b) Ease of extraction
- c) Nearness to the market
- d) All of the above**

39. Ideally cover of forest should be _____ of the total area of a country.

- a) 23%
- b) 30%**
- c) 33%
- d) 40%

40. This area has no permanent roads or settlements and is maintained primarily for its primitive character and non-motorized recreation. It is a _____

- a) wilderness area**
- b) primitive recreation area
- c) national park
- d) national forest

41. Where will the water sit the longest (longest renewal time) ?

- a) atmosphere
- b) freshwater lake
- c) glacier**
- d) ocean
- e) groundwater

42. Which one is not a disadvantage of a big dam?

- a) Extremely expensive
- b) Flooding of prime arable land
- c) Electric energy generated from hydropower**
- d) Blocking upstream migration of salmon
- e) Water loss with evaporation

43. Which of the following sources provides the least energy for industrialized countries ?

- a) Petroleum
- b) Nuclear fuels**
- c) Coal
- d) Gas

44. Which of the following energy sources provides a substantial amount of the energy needs for developed countries ?

- a) Hydropower**
- b) Wood
- c) Solar
- d) Charcoal

45. Which of the following is a highly exploited natural resource ?

- a) Water**
- b) Air
- c) Soil
- d) None of the above

46. What are called "Pastures of the sea" ?

- a) Estuaries
- b) Antarctic divergence
- c) Coastal water
- d) All of the above**

47. Which inhibits the naïve plant life on Antarctica from flourishing ?

- a) Temperature
- b) Volcanoes
- c) Drought**
- d) Ice

48. Soil containing many single soil called _____

- a) Pedon
- b) Poly pedon**
- c) Regloith
- d) Profile

49. Ground water is depleting at the rate of _____

- a) 10 cm/Year
- b) >10 cm/Year
- c) <10 cm/Year**
- d) <5 cm/Year

50. India is going to be water stressed country in 2025 and then water availability is going to be between 1000 to 1700 cu. m per person predicted by _____

- a) UNESCO
- b) UNDP
- c) UNEP**
- d) EPA

51. Method which increases the amount of land used for cultivation on steep slope and mountains and reduces erosion is _____

- a) Gully control
- b) Zero tillage
- c) Terracing**
- d) Contour farming

52. Only ____ % of total water resources is available for human use.

- a) 0.2%**
- b) 2.5%
- c) 6.12%
- d) 6.5%

53. Resources which are not reproducible are called _____

- a) Non reproducible resources
- b) Non renewable resources**
- c) Renewable resources
- d) Cyclic resources

54. Soil fertility is an example for _____ resource.

- a) Non-reproducible resources
- b) Non-renewable resources
- c) Renewable resources**
- d) Cyclic resources

55. Which one of the following is a passive factor affecting soil formation _____

- a) Topography
- b) Time
- c) Parent material
- d) All of the above**

56. Drought is caused due to _____

- a) Variability in rainfall
- b) Delay in onset of monsoon
- c) Duration of the break in monsoon
- d) All of the above**

Additional Questions

1. The main driving force of ecological system is _____

- a) wind energy
- b) water energy
- c) solar energy**
- d) earth energy

2. Oxygen is an example of _____

- a) Renewable resources**
- b) Non-renewable resources

3. Coal is an example of _____

- a) Renewable resources
- b) Non-renewable resources**

4. Coal, petroleum and natural gas are called as _____

- a) non-fossil fuels
- b) fossil fuels**
- c) semi-fossil fuels
- d) transparent fuel

5. Minerals, rocks, salts and chemical are termed as _____

- a) abiotic resources**
- b) biotic resources
- c) semi-transparent resources
- d) falling resources

6. Mineral resources are the natural resources.

- a) True**
- b) False

7. The resources which are inexhaustive and can be regenerated within a given span of time are called as _____

- a) Renewable resources**
- b) Non-renewable resources
- c) Solar resources
- d) Non-solar resources

8. As per the Ecological uses, a typical tree produces commercial goods worth about _____

- a) 100
- b) 1000
- c) 3000
- d) 30,000**

9. The trees are called as, Earth's _____

- a) Heart
- b) Brain
- c) Lungs**
- d) Beli

10. The main greenhouse gas is absorbed by the forests as a raw material for photosynthesis.

- a) O₂
- b) CO₂**
- c) SO₂
- d) O₃

11. About _____ million species are found in the tropical forest alone.

- a) 5
- b) 10
- c) 7**
- d) 100

12. As per MOEF Annual report (2005-06), in India total forest area is about _____

- a) 68,000,000 ha**
- b) 10,000,000 ha
- c) 10,686,800 ha
- d) 20 ha

13. Chhota Nagpur is famous for _____

- a) Sugar
- b) Tea gardens**
- c) Rose gardens
- d) Rice mill

14. About _____ % of the Earth's surface is covered by water.

- a) 10
- b) 100
- c) 90
- d) 75**

15. Out of the total water reserves of the world, about _____ is salty water (marine) and only _____ is fresh water.

- a) 97%, 3%**
- b) 3%, 97%
- c) 1%, 99%
- d) 2%, 98%

16. A layer of sediment or rock that is highly permeable and contains water is called _____

- a) aquifer**
- b) spring
- c) glacier
- d) seepage

17. Diamond is the non-metallic minerals.

- a) True**
- b) False

18. Graphite is the non-metallic minerals.

- a) True
- b) False

19. FAO stands for _____

- a) Food and Agriculture Organisation
- b) Food and Agro Operations
- c) Frequent Agriculture Organisation
- d) Flood and Agriculture Organisation

20. When the concentration of nitrates in water exceeds 45 mg/L, they become the cause of a serious health hazard called _____

- a) Luckemia
- b) Blue baby syndrome
- c) Cancer
- d) Paralysis

21. CNG stands for _____

- a) Cooling Natural Gas
- b) Compressed Natural Gas
- c) Compound Natural Gas
- d) Critical Natural Gas

22. It is a mixture of carbon monoxide and hydrogen.

- a) CNG
- b) SNG
- c) GCN
- d) NGS

23. SNG stands for _____

- a) Synthetic Natural Gas
- b) Systematic Natural gas
- c) Sulphuric Natural Gas
- d) Silver Nitrogen Gas

24. During photosynthesis trees produce _____

- a) Oxygen
- b) CO₂
- c) CO
- d) Nitrogen

25. Forests prevents soil erosion by binding soil particles by their _____

- a) steams
- b) leaves
- c) roots**
- d) buds

26. Wood pulp is used for making _____

- a) lumber
- b) paper**
- c) chipboard
- d) gum

27. About 20 species of all pests are known which have become immune to all types of pesticides are known as _____

- a) super kill
- b) super pests**
- c) value pests
- d) suprim pests

28. Per capita use of water is the highest in _____

- a) USA**
- b) India
- c) Indonesia
- d) Kuwait

29. Blue baby syndrome (methaemoglobinemia)

- a) Sulphur
- b) Arsenic
- c) Phosphates
- d) Nitrates**

30. In a food chain, accumulation of non-biodegradable materials is called _____

- a) Biomagnification**
- b) Buffer
- c) Detoxification
- d) Alter

31. The minimum time required for the formation of one inch of top soil is _____

- a) 10 years
- b) 5 years
- c) 100 years
- d) 200 years**

32. The forest cover of India in 1980 was around _____ of the total land mass.

- a) 22.7**
- b) 32.7
- c) 42.7
- d) 52.7

33. As per environmentalists we should ideally have _____ cover of forest.

- a) 33%**
- b) 43%
- c) 53%
- d) 63%

34. _____% of the water on the earth is salt water.

- a) 97**
- b) 87
- c) 77
- d) 67

35. The framework for allocating water resources to various users is known as

- _____
- a) water problems
- b) water rights**
- c) water conflicts
- d) water solutions

36. The combined mass of water found on under and on the surface of the planet is known as _____

- a) hydrosphere**
- b) water cycle
- c) hydro cycle
- d) earth sphere

37. The total mass of the Earth's hydrosphere is approx _____

a) 1.4×10^{18} tonnes

b) 16×10^{18} tonnes

c) 16.4×10^{18} tonnes

d) 100×10^{18} tonnes

38. The total mass of earth hydrosphere is about _____ % of the earth's total mass.

a) 1

b) 0.081

c) 0.023

d) 0.001

39. Surface water is _____ % of the fresh water.

a) 0.3

b) 0.9

c) 1.1

d) 11

40. _____ % of fresh water is entrapped in icecaps and glaciers.

a) 1.1

b) 2.8

c) 68.7

d) 98.2

41. The Himalayas, which is often called as _____

a) The roof of the world

b) The top of the world

c) The cover of the world

d) The shield of the world

42. The plants stored energy from the sun during _____

a) photoenergy

b) photosynthesis

c) photochemicals

d) photoelectron

43. Fossil fuels are termed as _____

a) renewable energy

b) non-renewable energy

c) earth energy

d) planet energy

44. About _____ of global final energy consumption comes from renewable energy.

- a) 6%
- b) 26%
- c) 36%
- d) 16%**

45. Geothermal heat is an example of _____ energy.

- a) renewable**
- b) non-renewable
- c) potential
- d) kinetic

46. Sunlight, wind and rain are the examples of _____ energy.

- a) renewable**
- b) non-renewable
- c) potential
- d) kinetic

47. India has about _____ major types of soil.

- a) 6**
- b) 17
- c) 27
- d) 37

48. EFL stands for _____

- a) Ecological Fragile Land**
- b) Ecological Fruitful Land
- c) Ecological Fractured Land
- d) Environmental Fatigue Land

49. There are _____ types of mineral resources.

- a) one
- b) two
- c) three**
- d) four

50. Ignited _____ is a common source of explosions in coal mines.

- a) Methane gas**
- b) $\text{CO}_2 + \text{SO}_2$
- c) O_3
- d) Nitrogen gas

51. The resources which can be used again and again passing through some processes are known as _____

- a) cyclic resources**
- b) non-cyclic resources
- c) continuous resources
- d) proper resources

52. Water used in industry and domestic purpose can be cleaned and used against for similar or other purpose. Such resources are called as _____

- a) cyclic resources**
- b) non-cyclic resources
- c) continuous resources
- d) proper resources

53. Nuclear power plant use _____ as fuel.

- a) uranium**
- b) sulphate
- c) tungsten
- d) O₃

54. In Maharashtra Nuclear power plant is in

- a) Chandrapur
- b) Tarapur**
- c) Nagpur
- d) Sangh

55. Nuclear Power Plant is in Kota which is in _____ state.

- a) Maharashtra
- b) Gujarat
- c) Rajasthan**
- d) Orisa

56. Kalapakam Nuclear power plant is in

- a) Chennai**
- b) Nagpur
- c) Mumbai
- d) Bhopal

57. The energy obtained from organic matter is termed as _____

- a) Bio energy**
- b) potential energy
- c) Cosmos energy
- d) Earth energy

58. Bio gas is obtained from organic matter is termed as _____

- a) Nuclear plant
- b) Coal plant
- c) Oxygen plant
- d) Gobar gas plant**

59. _____ are energy resources that formed from the buried remains of plants and animals that lived million years ago.

- a) Fossil fuels**
- b) Green fuels
- c) Bio-mass
- d) Artificial fuels

60. _____ are concentrated forms of sun's energy and termed as non-renewable resources of energy.

- a) Bio-mass
- b) Green fuels
- c) Fossil fuels**
- d) Artificial fuels
