

EES UNIT 3 Question bank

1. The species with thin population localised within restricted are is said to be _____

- a) Rare**
- b) Threatened
- c) Endangered
- d) Vulnerable

2. The reason for certain animals getting endangered are _____

- a) Hunting
- b) Pollution of environment
- c) Natural calamities
- d) all of these**

3. The Red Data Book maintains a record of the _____

- a) Plants and animals present in the whole world
- b) Relationship between man and biosphere
- c) Plants and animals which are known to be endangered**
- d) Forest wealth in the whole world

4. Planting trees in a deforested land is known as _____

- a) Afforestation**
- b) Deforestation
- c) Silviculture
- d) Sericulture

5. In a national park protection is given to _____

- a) The entire flora
- b) The entire fauna
- c) The plants and animals
- d) the entire ecosystem**

6. The endangered animal of the following is _____

- a) Crow
- b) Parrot
- c) Red Jungle fowl**
- d) Cock

7. The phenomenon of the entry of toxic chemicals into the food chains and more concentrated at higher trophic levels is called _____

a) Biological control

b) Biomagnification

c) Algal bloom

d) Red tide

8. The tropical forests in India are located in _____

a) Himachal Pradesh

b) Jammu and Kashmir

c) Andamans

d) Orissa

9. Bharatpur bird sanctuary is situated in _____

a) Kerala

b) Karnataka

c) Gujarat

d) Rajasthan

10. Autumn colouration of leaves appears only in _____

a) Tropical regions

b) Evergreen plants

c) Deserts

d) Temperate deciduous plants

11. MAS programme stands for _____

a) Man and biology

b) Man and biotechnology

c) Man and biosphere

d) Material and biology

12. The ICUN headquarters are at _____

a) Morges, Switzerland

b) Paris, France

c) Vienna, Austria

d) New York, USA

13. How many bio-graphical regions are present in India ?

a) 3

b) 4

c) 7

d) 10

14. Lime is added to the soil which is too _____

- a) Sandy
- b) Salty
- c) Alkaline
- d) Acidic**

15. Which one of the following has maximum genetic diversity in India ?

- a) Tea
- b) Teak
- c) Mango**
- d) Wheat

16. Which one of the following areas in India, is a hotspot of biodiversity ?

- a) Sunderbans
- b) Western ghats**
- c) Eastern ghats
- d) Gangetic plain

17. Darwin's finches are a good example of _____

- a) Convergent evolution
- b) Industrial melanism
- c) Connecting link
- d) Adaptive radiation**

18. The least porous soil among the following is a _____

- a) Loamy soil
- b) Silty soil
- c) Clayey soil**
- d) Peaty soil

19. Which one of the following is not a renewable, exhaustible natural resource ?

- a) Aquatic animals
- b) Wild life
- c) Soil fertility
- d) Minerals**

20. Which one of the following is an example of ex-situ conservation ?

- a) National park
- b) Wildlife sanctuary
- c) Seed bank**
- d) Sacred groves

21. Which one of the following is not observed in biodiversity hotspots ?

- a) Species richness
- b) Endemism
- c) Accelerated species loss
- d) Lesser inter-specific competition**

22. Sacred groves are specially useful in _____

- a) Generating environmental awareness
- b) Preventing soil erosion
- c) Year-round flow of water in rivers
- d) Conserving rare and threatened species**

23. The term Alpha diversity refers to _____

- a) Genetic diversity
- b) Community and ecosystem diversity**
- c) Species diversity
- d) Diversity among the plants

24. The percentage of forest cover recommended by the National Forest policy (1988) is _____

- a) 33% for plains and 67% for hills**
- b) 37% for plains and 63% for hills
- c) 20% for plains and 70% for hills
- d) 23% for plains and 77% for hills

25. Select the correct statement about biodiversity _____.

- a) The desert areas of Rajasthan and Gujarat have a very high level of desert animal species as well as numerous rare animals.
- b) Large scale planting of BT cotton has no adverse effect on biodiversity
- c) Western ghats have a very high degree of species richness and endemism**
- d) Conservation of biodiversity is just a fad pursued by the developed countries

26. Biodiversity of a geographical region represents _____

- a) Genetic diversity present in the dominant species of the region
- b) Species endemic to the region
- c) Endangered species found in the region
- d) The diversity in the organisms living in the region**

27. Global warming can be controlled by _____

- a) Reducing deforestation, cutting down use of fossil fuel**
- b) Reducing reforestation, increasing the use of fossil fuel
- c) Increasing deforestation, slowing down the growth of human population
- d) Increasing deforestation, reducing efficiency

28. Which one of the following is not used for ex situ plant conservation ?

- a) Field gene banks
- b) Seed banks
- c) Shifting cultivation**
- d) Botanical garden

29. Which of the following represent maximum number of species among global biodiversity ?

- a) Algae
- b) Lichens
- c) Fungi**
- d) Mosses and Ferns

30. Prolonged liberal irrigation of agricultural fields is likely to create the problem of _____

- a) Aridity
- b) Metal toxicity
- c) Salinity**
- d) Acidity

31. The greatest problem of water conservation is to reduce the amount of _____

- a) Precipitation
- b) Run-off water**
- c) Groundwater
- d) Evaporation

32. Maximum nutritional diversity is found in the group :

- a) Monera**
- b) Plantae
- c) Fungi
- d) Animalia

33. Which one of the following is not included under in situ conservation ?

- a) National park
- b) Wild life sanctuary
- c) Zoological garden**
- d) Biosphere reserve

34. Which one of the following expanded forms of the following acronyms is correct ?

- a) IUCN = International Union for Conservation of nature and Natural Resources**
- b) IPCC = International Panel for Climate Change
- c) UNEP = United nations Environmental Policy
- d) EPA = Environmental Pollution Agency

35. Wild life conservation aims at _____.

- i) Maintaining the ecological process**
- ii) To enrich the wildlife diversity with exotic species**
- iii) Preventing migration of species**
- iv) Maintaining the diversity of life**

The correct statements are _____.

- a) i, ii
- b) ii, iii
- c) iii, iv
- d) i, iv**

36. Plants like Aegle marmelos, Ocimum sanctum and Ficus religiosa are a group of plants designated as _____.

- a) Traditional food crops
- b) Sacred species of plants**
- c) Medicinal plant species
- d) Lesser known food plants

37. -1°C to 13°C annual variations in the intensity and duration of temperature and 50 to 250 cm annual variation in precipitation, account for the formation of major biome as _____.

- a) Tropical forest
- b) Coniferous forest**
- c) Temperate forest
- d) Grassland

38. Sacred groves are specially useful in

- a) Generating environmental awareness
- b) Preventing soil erosion
- c) Year-round flow of water in rivers
- d) Conserving rare and threatened species**

39. Some of the nutrient cycles are labelled as below

Sulphur cycle

i. Phosphorous cycle

ii. Carbon cycle

iii. Nitrogen cycle

iv. Of these, the sedimentary cycle is represented by _____

- a) i only
- b) ii only
- c) iii only
- d) i and ii only**

40. Study the four statements (i-iv) given below and select the two correct ones out of them _____.

i. A lion eating a deer and a sparrow feeding on grain are ecologically similar in being consumers

ii. Predator star fish Pisaster helps in maintaining species diversity of some invertebrates

iii. Predators ultimately lead to the extinction of prey species

iv. Production of chemicals such as nicotine, strychnine by the plants are metabolic disorders.

The two correct statements are _____

- a) i and ii**
- b) ii and iii
- c) iii and iv
- d) i and iv

41. Which of the following countries has the highest biodiversity ?

- a) Brazil**
- b) South Africa
- c) Russia
- d) India

42. Which of the following is not a cause for loss of biodiversity ?

- a) Destruction of habitat
- b) Invasion by alien species
- c) Keeping animals in zoological parks**
- d) Over-exploitation of natural resources

43. Which of the following is not an invasive alien species in the Indian context ?

- a) Lantana
- b) Cynodon**
- c) Parthenium
- d) Eichhornia

44. Where among the following will you find pitcher plant ?

- a) Rain forest of North-East India**
- b) Sunderbans
- c) Thar desert
- d) Western ghats

45. Which one of the following is not a major characteristic feature of biodiversity hot spots ?

- a) Large number of species
- b) Abundance of endemic species
- c) Large number of exotic species**
- d) Destruction of habitat

46. Match the animals given in column A with their location in column B :

Column A	Column B
i. Dodo	a. Africa
ii. Quagga	b. Russia
iii. Thylacine	c. Mauritius
iv. Stellar's sea cow	d. Australia

Choose the correct match from the following :

- a) i-a , ii-c , iii-b , iv-d
- b) i-d , ii-c , iii-a , iv-b
- c) i-c , ii-a , iii-b , iv-d
- d) i-c , ii-a , iii-d , iv-b**

47. What is common to the following plants :

Nepenthes, Psilotum, Rauwolfia, Aconitum ?

- a) All are ornamental plants
- b) All are phylogenic link species
- c) All are prone to over exploitation**
- d) All are exclusively present in the Eastern Himalayas

48. The one-horned rhinoceros is specific to which of the following sanctuary.

- a) Bhitarkanika
- b) Bandipur
- c) Kaziranga**
- d) Corbett park

49. Amongst the animal groups given below, which one has the highest percentage of endangered species ?

- a) Insects
- b) Mammals
- c) Amphibians**
- d) Reptiles

50. Which one of the following is an endangered plant species of India ?

- a) Rauwolfia serpentina
- b) Santalum album (Sandal wood)
- c) Cycas beddomei
- d) All of these**

51. What is common to Lantana, Eichhornia and African catfish ?

- a) All are endangered species of India
- b) All are key stone species
- c) All are mammals found in India
- d) All the species are neither threatened nor indigenous species of India**

52. The extinction of passenger pigeon was due to _____

- a) Increased number of predatory birds
- b) Over exploitation by humans**
- c) Non-availability of the food
- d) Bird flu virus infection

53. Which of the following statements is correct ?

- a) Parthenium is an endemic species of our country
- b) African catfish is not a threat to indigenous catfishes
- c) Stellar's sea cow is an extinct animal**
- d) Lantana is popularly known as carrot grass

54. Among the ecosystem mentioned below, where can one find maximum biodiversity ?

- a) Mangroves
- b) Desert
- c) Coral reefs**
- d) Alpine meadows

55. Which of the following forests is known as the 'lungs of the planet Earth' ?

- a) Tiaga forest
- b) Tundra forest
- c) Amazon rainforest**
- d) Rain forests of North East India

56. The active chemical drug reserpine is obtained from _____.

- a) Datura
- b) Rauwolfia**
- c) Atropa
- d) Papaver

57. Which of the following group of plants exhibit more species diversity ?

- a) Angiosperms
- b) Algae
- c) Bryophytes
- d) Fungi**

58. Which of the below mentioned regions exhibit less seasonal variations ?

- a) Tropics**
- b) Temperates
- c) Alpines
- d) Both a and b

59. The historic convention on Biological Diversity held in Rio de Janeiro in 1992 is known as _____.

a) CITES convention

b) The Earth Summit

c) G-16 Summit

d) MAB Programme

60. What is common to the techniques ?

1. In Vitro Fertilisation

2. Cryopreservation

3. Tissue culture

a) All are in situ conservation methods

b) All are ex situ conservation methods

c) All require ultra modern equipment and large space

d) All are methods of conservation of extinct organisms

61. The edge effect _____ the amount of habitat typical to an ecosystem.

a) increases

b) reduces

c) keeps same

d) none of the above

62. A _____ is a population divided into smaller groups by habitat fragmentation.

a) Source population

b) Keystone population

c) Metapopulation

d) Sink population

63. Extinction of the _____ of a community could lead the extinction of other members of community.

a) decomposers

b) primary consumers

c) keystone species

d) numerically dominant species

64. What organism is near extinction due to overexploitation ?

a) Exotic pets

b) Rare cacti

c) Siberian tiger

d) All of the above

65. Eutrophication is caused by runoff containing nutrients that does what to kill fish in a lake ?

- a) Algae overproduce and die; bacteria use up all the oxygen so fish die**
- b) Algae overproduce and crowd out fish and other species
- c) Fish overproduce and eat all possible sources of food then starve
- d) Algae overproduce oxygen, which is toxic to fish in high quantities

66. Humans have introduced alien species into the environment in all these ways except _____.

- a) genetic engineering**
- b) human colonization
- c) horticulture and agriculture
- d) accidental transport

67. What percentage of coral reefs have already been destroyed ?

- a) 10%
- b) 25%**
- c) 60%
- d) 100%

68. What activity does not constitute habitat loss ?

- a) Highway construction
- b) Forest fragmentation as new towns are built
- c) Converting wetland into housing areas
- d) None of these**

69. Which of these is not an indirect value of biodiversity ?

- a) Run off from natural ecosystems pollutes sources of fresh water**
- b) Regulation of the climate
- c) Prevention of soil erosion
- d) Participation in biogeochemical cycles

70. Why is biodiversity valuable and desirable to humans ?

- a) For medical purposes
- b) For agricultural purposes
- c) For consumptive use
- d) All of these**

Additional questions

1. The study of ecosystems is called as _____.

a) Environment

b) Ecology

c) E-study

d) Cosmos

2. The term Ecology was given by _____ in 1869.

a) Earnest Haeckel

b) Newtons

c) S. W. Flemig

d) S. D. Lal

3. Photosynthesis is also known as _____.

a) photo citosis

b) photo-crysis

c) photo autotrophs

d) photo-geology

4. The sequence of eating and being eaten in an ecosystem is known as _____

a) Food supply

b) Food constant

c) Food habit

d) Food chain

5. Grass → Rabbit → Fox is an example of _____.

a) parallel food chain

b) grazing food chain

c) detritus food chain

d) animal food chain

6. There are mainly two types of food chain, one is grazing food chain and other is _____.

a) animal food chain

b) auto food chain

c) grazing-auto food chain

d) detritus food chain

7. The grazing food chain derives energy from _____ energy.

- a) plant
- b) fish
- c) animals
- d) sun**

8. To maintain ecological balance and regulate the population size of different animals, this is useful.

- a) Sun chain
- b) Wind chain
- c) Food chain**
- d) Grass chain

9. Food web is a network of _____.

- a) food resort
- b) food balance
- c) food chains**
- d) food supply and demand

10. Number of options of eating and being eaten at each trophic level is available in _____.

- a) food chain
- b) food web**
- c) solar chain
- d) cosmos chain

11. Ecological pyramids are of three types. One is pyramid of numbers, second is pyramid of biomass and third is pyramid of _____.

- a) sun
- b) wind
- c) water
- d) energy**

12. The most important feature of energy flow in ecosystem is that it is _____.

- a) one way flow**
- b) two way flow
- c) three way flow
- d) no flow

13. The flow of energy follows the two laws of _____.

- a) kinetics
- b) kinematics
- c) statistics
- d) thermodynamics**

14. Energy flow through an ecosystem was explained by _____.

- a) E. P. Odum**
- b) E. P. Rax
- c) E. P. Zen
- d) E. P. Watson

15. Double channel energy flow model is also called as _____.

- a) X-shaped energy flow model
- b) Y-shaped energy flow model**
- c) Z-shaped energy flow model
- d) A-shaped energy flow model

16. About 1/3rd of our land area is covered by _____.

- a) deserts**
- b) grassland
- c) water
- d) forest

17. Dal lake is in _____.

- a) Srinagar**
- b) Delhi
- c) Yavatmal
- d) Nainital

18. Fishes are the examples of _____ organisms.

- a) Neustons
- b) Nektons**
- c) Benthos
- d) Periphytons

19. Herbivores means _____.

- a) plant eaters**
- b) meat eaters
- c) both plant and meat eaters
- d) none of these

20. Herbivores are also called as _____.

- a) primary consumers**
- b) secondary consumers
- c) tertiary consumers
- d) none of these

21. The organisms who feed directly on producers are called _____.

- a) carnivores
- b) herbivores**
- c) omnivores
- d) none of these

22. Carnivores means _____.

- a) plant eaters
- b) meat eaters**
- c) fish eaters
- d) none of these

23. Carnivores are also called as _____.

- a) primary consumers
- b) secondary consumers**
- c) tertiary consumers
- d) omnivores

24. Pyramid of _____ is always upright.

- a) energy**
- b) biomass
- c) forest
- d) mass

25. Movement of nutrients in an ecosystem is cyclic, while flow of energy is _____.

- a) zero directional
- b) unidirectional**
- c) two directional
- d) Y and Z directional

26. The organisms which fed on dead organic matter is called as _____.

- a) saprotrophs**
- b) fungi
- c) zooplanktons
- d) algae

27. The organisms which feed on dead organisms, wastes of living organisms are called _____.

- a) chemotrophs
- b) carnivores
- c) detritivores**
- d) decomposers

28. The progressive accumulation of some non-biodegradable chemicals through the food chain is known as _____.

- a) Ecological balance
- b) Biological inflection
- c) Biological magnification**
- d) Bio-degradation

29. The totality of genes, species and ecosystem of a region is called as _____.

- a) Bio-society
- b) Bio-diversity**
- c) Bio-living
- d) Bio-physics

30. Approximately _____ % of the known species are insects.

- a) 31
- b) 21
- c) 11
- d) 61**

31. Only _____ species of mammals are known to science.

- a) 2100
- b) 2760
- c) 4650**
- d) 1111

32. Thar in India is a _____.

- a) desert**
- b) sea
- c) river
- d) muddy land

33. Chilka lake is in _____.

- a) Maharashtra
- b) Bihar
- c) Orissa**
- d) U.P.

34. The biological diversity include three hierarchical leaves

1. genetic diversity

2. species diversity and third is _____.

a) community and ecosystem diversity

- b) animal and plant diversity
- c) local diversity
- d) mollusks diversity

35. The genetic variation existing within a species is called _____.

a) genetic diversity

- b) local animal diversity
- c) species diversity
- d) ecosystem diversity

36. _____ plays a key role in the maintenance of diversity at species and community level.

a) Speciation

- b) Species richness
- c) Roll of species in land
- d) Evenness of species

37. The evolution of new species is called as _____.

- a) ciation
- b) mutation
- c) mitigation
- d) speciation**

38. The species diversity of a region is measured on the basis of two parameters one is evenness and

a) species richness

- b) equitability
- c) oddness
- d) speciation

39. The number of species per unit area is known as _____.

- a) evenness
- b) equitability of species
- c) species richness**
- d) speciation

40. There are three perspectives of the diversity at the level of community. There are alpha diversity, beta diversity and _____ diversity.

- a) sigma
- b) zeta
- c) gamma**
- d) magma

41. The diversity within the community involves in _____.

- a) sigma diversity
- b) beta diversity
- c) gamma diversity
- d) alpha diversity**

42. Diversity between the communities refers in _____.

- a) Sigma diversity
- b) Beta diversity**
- c) Gamma diversity
- d) Alpha diversity

43. _____ refers to the diversity of the habitats over the total landscape of geographical area.

- a) Beta diversity
- b) Alpha diversity
- c) Gamma diversity**
- d) Sigma diversity

44. Species determining the ability of large number of other species to persist in the community is called as _____.

- a) keystone species**
- b) alpha species
- c) grass species
- d) variant species

45. About _____ % of the Indian landmass is occupied by Deccan peninsula.

- a) 25
- b) 35
- c) 42**
- d) 61

46. About 42% of the Indian landmass is occupied by _____.

a) Deccan peninsula

- b) Thar desert
- c) Sea
- d) Grassland

47. The species which are confined to a particular country is called _____.

- a) Magnified species
- b) Definite species
- c) De-magnified species
- d) Endemic species**

48. Plant based synthetic products are called as _____.

a) botanochemicals

- b) biochemicals
- c) bio-dio-chemicals
- d) oxichemicals

49. Morphine is a _____ use of biodiversity.

- a) Chemical
- b) Physical
- c) Medicinal**
- d) Mechanical

50. Quinine, the drug is used for treatment of _____ is an example of benefits of biodiversity.

- a) Bone – T.B.
- b) Cancer
- c) Colera
- d) Malaria**

51. The name of largest flying bird of today is _____.

a) California condor

- b) Mangor bird
- c) Egel-sofara
- d) Egel-sky-sulfer

52. New species entering a geographical region are called _____ species.

- a) Exotic**
- b) Extic
- c) Toxic
- d) Exto exotic

53. Exotic species are also called as _____.

- a) Extra species
- b) Modular species
- c) Aline species**
- d) Modern species

54. Killing of prohibited wild animals for illegal trading of wildlife products is called _____.

- a) Morching
- b) Kill-killing
- c) Poaching**
- d) Cross-killing

55. There are two basic strategies of biodiversity conservation, one is on site and other is _____.

- a) over site
- b) off site**
- c) reverse site
- d) protection site

56. In-situ conservation of biodiversity is also called as _____.

- a) on site**
- b) ex-situ
- c) over site
- d) global site

57. WCMC stands for _____.

- a) World Conservation Monitoring Centre**
- b) Wild Conservation Monitoring Centre
- c) World Control Monitoring Centre
- d) World Conservation Management Centre

58. The earliest National park is _____ in USA.

- a) Yellow-park
- b) Yellow-wild life
- c) Yellow-stone**
- d) Yellow-centre

59. The earliest National park near Sydney (Australia) is _____.

- a) Rogar
- b) Royal**
- c) Yellow-stone
- d) Yellow-centre

60. The Jim Corbett National Park is near _____ .

- a) Nainital**
- b) Delhi
- c) Mumbai
- d) Nagpur

61. First National park established in India is _____.

- a) Jawaharlal Nehru National Park
- b) Salim Ali National Park
- c) Dr. Bose National Park
- d) Jim Corbett National Park**

62. National Park is an example of _____ conservation strategies of biodiversity.

- a) in-situ**
- b) ex-situ
- c) over situ
- d) protection of wild life

63. Wild life sanctuaries is an example of _____ conservation strategies of biodiversity.

- a) in-situ**
- b) off situ
- c) ex-situ
- d) reverse off situ

64. Kaziranga National Park is in _____.

- a) Maharashtra
- b) Bihar
- c) Assam**
- d) Delhi

65. Corbett National Park is in _____.

- a) Uttaranchal**
- b) Delhi
- c) Haryana
- d) Punjab

66. Gir National Park is in _____.

- a) Maharashtra
- b) Goa
- c) Gujarat**
- d) M. P.

67. Tadoba National Park is in _____.

- a) Gujarat
- b) Maharashtra**
- c) M.P.
- d) U.P.

68. The _____ are a special category of protected areas of land or coastal environments, wherein people are an integral component of the system.

- a) Biosphere reserves**
- b) National park
- c) Sanctuaries
- d) None of these

69. At present there are _____ biosphere reserves in India.

- a) 3
- b) 24
- c) 20
- d) 13**

70. The biosphere reserve consists of _____ zones.

- a) 1
- b) 2
- c) 3**
- d) 4

71. The biosphere reserve consists of three zones core, buffer and _____.

- a) semi-buffer
- b) semi-core
- c) transparent
- d) transition**

72. The outermost part of the biosphere reserve is the _____.

- a) Core zone
- b) Buffer zone
- c) Transitional zone**
- d) Semi-buffer zone

73. Undisturbed and legally protected ecosystem comes under _____ of a biosphere reserve.

- a) Core zone**
- b) uncore zone
- c) preserve zone
- d) buffer zone

74. _____ lake in Sikkim has been declared sacred by the people to save aquatic life from degradation.

- a) Khecheopalri**
- b) Dal
- c) Nal
- d) Zorich

75. Germ plasm banks or gene banks are established for _____ conservation of biodiversity.

- a) in-situ
- b) ex-situ**
- c) over situ
- d) none of these

76. Storage of germ-plasm at ultra low temperature is called _____.

- a) cryopreservation**
- b) preservation-germ
- c) germ-pre
- d) none of these

77. In cryopreservation, storage of germplasm at ultra low temperature is preserved. That ultra low temperature is _____.

- a) -196° C in liquid nitrogen**
- b) 196° C in liquid nitrogen
- c) 0° C in liquid nitrogen
- d) 100° C in liquid nitrogen

78. The book list containing a record of threatened species is called as _____.

- a) yellow data book
- b) red data book**
- c) orange data book
- d) wild data book

79. Ecosystem is generally understood as the entire assemblage of _____.

- a) biotic component**
- b) abiotic component
- c) complex community
- d) total community

80. Convention of Biological Diversity (CBD) signed by almost _____ nations.

- a) 100
- b) 200**
- c) 300
- d) 400

81. Land based ecosystem is called as _____.

- a) Terrestrial ecosystem**
- b) Non-terrestrial ecosystem
- c) Aquatic ecosystem
- d) Modern aqua ecosystem

82. The ecosystem which flourish in water is called as _____.

- a) aquatic ecosystem**
- b) non-aquatic ecosystem
- c) terrestrial ecosystem
- d) modern aqua ecosystem

83. Tundra is an example of _____ ecosystem.

- a) Terrestrial**
- b) Non-terrestrial
- c) Aquatic
- d) Physical

84. Open oceans is an example of _____ ecosystem.

- a) Aquatic**
- b) Non-aquatic
- c) Terrestrial
- d) Earthen

85. The relationship between the biotic and abiotic components of an ecosystem is called _____.

- a) colonies
- b) non-colonies
- c) holocoenosis**
- d) cosmos

86. Sunlight is necessary for _____.

- a) carbon credit
- b) water pollution
- c) air pollution
- d) photosynthesis**

87. _____ is the medium by which mineral nutrients enter and due translocated plants.

- a) Water**
- b) pH
- c) $\text{CO}_2 + \text{SO}_2$
- d) Carbon

88. _____ are the living organisms in the ecosystem that take energy from sunlight and use it to transform carbon dioxide and oxygen in sugars.

- a) Producers**
- b) Non-producers
- c) Biotic + SO_2
- d) Abiotic

89. Plant, algae and photosynthetic bacteria are all examples of _____.

- a) reducers
- b) producers**
- c) abiotic
- d) non-biotic

90. The green plants manufacture their own food, they are known as _____.

- a) autotrophs**
- b) non-consumers
- c) consumers
- d) non-consumers

91. _____ are living organisms in the ecosystem that get their energy from consuming other organisms.

- a) Consumers**
- b) Non-consumers
- c) Producers
- d) Non-biotic

92. Herbivores eat _____.

- a) animals
- b) producers**
- c) non-biotic
- d) ecosystem

93. Carnivores eat _____.

- a) other animals**
- b) non-biotic things
- c) plants
- d) non-ecosystem animals

94. _____ eat both producers and other animals.

- a) Omnivores**
- b) Non-omnivores
- c) Herbivores
- d) Carnivores

95. Rabbit, deer, goat, cattle are the examples of _____.

- a) herbivores**
- b) non-herbivores
- c) omnivores
- d) ecosystem

96. Lions and tigers are examples of _____.

- a) non-omnivores**
- b) omnivores
- c) producers
- d) non-producers

97. Earthworms are the example of _____.

- a) omnivores
- b) reducers**
- c) ecosystem
- d) non-ecosystem

98. The decomposers are known as _____.

- a) non-saprotrophs
- b) saprotrophs**
- c) abiotic
- d) semian

99. _____ are living component of ecosystem that breaks down waste material and dead organisms.

- a) Decomposers**
- b) Non-decomposers
- c) Abiotic
- d) Omnivores

100. There are ____ levels of biodiversity.

- a) one
- b) two
- c) three**
- d) four

101. _____ diversity refers to the diversity of organisms sharing the same community/habitat.

- a) Alpha**
- b) Beta
- c) Gamma
- d) Alpha and Beta

102. The rate of replacement of species along a gradient of habitats or communities is called _____ diversity.

- a) Alpha
- b) Beta**
- c) Gamma
- d) Alpha + Beta

103. Diversity of habitats over the total landscape or geographical area is called _____ diversity.

- a) Alpha
- b) Beta
- c) Gamma**
- d) Alpha + Beta

104. Use value that consists of direct value, indirect value and _____ values.

- a) option**
- b) beta
- c) alpha
- d) non-option

105. Non use value that consists of bequest value and _____ value.

- a) existence**
- b) non-existence
- c) alpha
- d) beta

106. India is known for its rich heritage of biological diversity, having already documented over _____ species of animals.

- a) 91000**
- b) 91
- c) 910
- d) 9100

107. India is known for its rich heritage of biological diversity, having already documented over _____ species of plants in its ten bio-geographic region.

- a) 15,500**
- b) 100000
- c) 1500
- d) 50

108. LMMC stands for _____.

- a) Like Minded Megadiverse Countries**
- b) Life Minded Megadiverse Countries
- c) Life Mindset Megadiverse Countries
- d) Like Minded Major Countries

109. In 2004 _____ was invited to chair like minded medadiverse countries for two years.

- a) India**
- b) Japan
- c) Norway
- d) America

110. CBD stands for _____ .

- a) Conference on Biological Diversity
- b) Convention on Biological Diversity**
- c) Conflict on Biological Diversity
- d) Convention on Bigger Diversity

111. The Union Ministry of Environment and Forests (MOEF) is the nodal agency for implementing provisions of _____ in India.

- a) CBD**
- b) CBCD
- c) ABCD
- d) CBDD

112. _____ is defined as any species which is likely to become an endangered species within the foreseeable future throughout all or significant portion of its range.

- a) Threatened**
- b) Relative species
- c) Rare species
- d) Absolute species

113. An _____ species is a species of organisms facing a very high risk of extinction.

- a) endangered**
- b) rare
- c) pure
- d) all of these

114. A _____ species is a group of organisms that are very uncommon or scarce.

- a) rare**
- b) all
- c) pure
- d) threatened

115. _____ species can be threatened with extinction through the process of genetic pollution.

- a) Endemic**
- b) Pure
- c) All
- d) Rare

116. _____ occurs when a resource is consumed at an unsubstantial rate.

- a) Over exploitation**
- b) Pure soil
- c) Poor soil
- d) Threatened

117. Biodiversity is the collection of flora and _____ of a place.

- a) bacteria
- b) fauna**
- c) virus
- d) plants

118. A region which is a prime location for the existence of rich biodiversity but also faces the threat of destruction is called as _____.

- a) Biodiversity hotspot**
- b) Local hotspot
- c) Biological hotspot
- d) Plannet hotspot

119. A total number of _____ biodiversity hotspots have been identified.

- a) 5
- b) 25
- c) 35**
- d) 55

120. India is a country _____ in biological diversity.

- a) poor
- b) very poor
- c) average
- d) rich**

121. World conservation monitoring centre has recognized _____ protected areas around the world.

- a) 37000**
- b) 37
- c) 47
- d) 1000

122. India has _____ protected areas.

- a) 581**
- b) 81
- c) 58
- d) 10

123. There are _____ national parks in India.

- a) 89**
- b) 99
- c) 999
- d) 10

124. There are _____ wildlife sanctuaries in India.

- a) 492**
- b) 92
- c) 999
- d) 10

125. The Jim Corbett National Park was the first National Park established in _____.

- a) India**
- b) China
- c) Norway
- d) America

126. _____ are the special category of protected areas of land and/or coastal environments, wherein people are an integral component of the system.

- a) Biosphere reserves**
- b) Bio-land
- c) Bio-reservoir
- d) Bio field

127. A biosphere reserve consist of core, buffer and _____ zones.

- a) pure
- b) integral
- c) natural
- d) transition**

128. In vitro conservation, particularly by cryopreservation in liquid nitrogen at a temperature of _____ degree C, is mainly useful for conserving vegetative propagated crops like potato.

- a) +196
- b) -196**
- c) 100
- d) zero

129. The Biological Diversity Act, _____ is an act of the parliament of India for preservation of biological diversity in India.

- a) 2000
- b) 2002**
- c) 2018
- d) 1999

130. The headquarter of National Biodiversity Authority (NBA) is in _____.

- a) Delhi
- b) Chennai**
- c) Kanpur
- d) Nagpur

131. _____ defines the ecosystem.

- a) Odum**
- b) Newton
- c) R. Rao
- d) Kennedy

132. Characteristics of ecosystem are given by

- a) Newton
- b) Smith**
- c) Charles
- d) Stoke

133. _____ is a linear sequence of organisms which starts from producer organisms and ends with decomposer species.

- a) Food web
- b) Cycle
- c) Food chain**
- d) Series of web

134. _____ is a connection of multiple food chains.

- a) Food sequence
- b) Food life
- c) Food web**
- d) Food series

135. Each level in the food chain is called a _____ level.

- a) food level
- b) trophic level**
- c) chain level
- d) producer level
